

Principles, Values & Concepts taught by the: **Balance the World Foundation**

The *Balance the World Foundation* is an organization that teaches and spreads the philosophies from the book Balance the World – The Roots of Our Problems. The following concepts are a few of the *main* philosophies that will be focused on, in an effort to help fix our problems in the world and establish a balance with our planet.

1. Understand the Roots of Our Problems – The combination of Selfishness and Stupidity.
 - We cannot fix our problems in the world without *understanding* what is causing them in the first place.
2. Promote the importance of Teamwork – We only have *one* Planet to share.
 - Belief that we have the ability to fix our problems...if we work together.
3. Improve our Educational System – Change the structure of High School Curriculums.
 - We should be training future *Good Citizens*, not just future *College Students & Employees*.
 - Teach *How* to explain *Why* Education is so Important.
4. Fight Over-Population - #1 Goal - Balance between our Human Population and our Planet.
 - Prioritize - How our Planet is *ultimately* more important than we Human Beings.
 - Massive Parenting Education & Sex Education.
 - Convince people it is not necessary for *everyone* to have kids in order to be happy and have a good life.
5. Fix & Improve broken Governments and Political Systems - Vote the Issue, not the Party.
 - Stop only *electing* our leaders...and start *controlling* our leaders!
 - Change the system so the votes and efforts of the people can have a far better impact.
6. Strengthen the United Nations – America needs to lead by Example.
 - USA is the greatest country in the world, but is **not** ‘good enough’! USA must work towards perfection for other countries to follow.
7. Compromise – The World is Grey – Every Issue is between 0% - 100%.
8. Improve Communication Skills – Stop Arguing!...Debate, and hold a *civil* Conversation.
 - One person does not have the only ‘point of view.’ Try to see issues from every angle before making your decision.
 - One World Language – Education, Teamwork and Compromise are impossible without Communication.
9. Media – Headlines are not enough...Start explaining the Details!
 - Stop misleading and brainwashing the public. Present the facts, and let people think for themselves.
10. Promote Fairness - Fairness is *not* Equality...it is what is Right, Deserved and Earned.
 - Know how to properly *judge* each other...only by things people actually have *control* over.
 - Life is Relative, but remember to *compare* everyone to the fictitious ‘Perfect Citizen’...not to each other.
11. Balance the Money in the World – Fair Economic System, and Financial Education for all.
12. Stop *Reacting* to Problems, and Start *Preventing* them from happening in the first place.
 - Stop pushing problems forward onto Future Generations.
13. Understand how *abusing* Religion prevents the much needed Teamwork in the World.
14. Prevent Boredom – Stay busy and out of trouble – Competition through Sports, not War.
15. Take Action - Face Reality - Stop ignoring our Problems & Do your Part...
 - Welcome Change - The World changes, so should We - Change actual parts of your Daily Routine and Lifestyle.
 - Be a good Citizen & follow Society’s Laws and Rules.
 - Maximize your time and effort, by using it where it will do the most good...Politics & Lawmaking.
 - Stop being Selfish...Start doing what is best for the World, and not just what is best for yourself.
 - Support the Balance the World Foundation & Spread the Word.
